Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-37 is/are pending in the application.

DETAILED ACTION

This office action is in response to applicants' communication filed on 10/2/06.

Claims 1-37 are pending in this application. Claims 12-19 and 27-37 stand withdrawn from the consideration being drawn to the non-elected invention.

Claim Rejections - 35 USC § 103

1. Claims 1-11 and 20-26 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Moran et al(US 6,576,793), all for the reasons of record.

Applicants' arguments were fully considered and were not found convincing. Applicants argue that there is no suggestion in the reference that the compound is crystalline in nature. Inasmuch as the acid salts of the compounds are made, its physical characteristics is inherent and just because the reference has not mentioned the characteristic of the salt, does not preclude it to be crystalline as it is inherent to the nature of the salt. Applicants have cited some examples of the acid salt which are basic and vice versa. The examiner does not dispute the same. However, in the instant compound, there are no basic functional radicals which will overtake the acid part to form the amorphous natured compound. In the instant compound, it is a simple compound with no basic or no acidic group present and its acid salt is likely to give crystalline form of the compound. Since there are two nitrogen present, it is expected that one of ordinary skill in the art can form either mono hydrochlorides salt or a dihydrochloride salt of the compound.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 1621

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-11 and 20-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-28 of copending Application No. 10/854,405. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant claims differ from the above patent application in terms of dihydrochloride salt in herein versus mono hydrochloride salt in the above patent application. However, it was well within the ordinary skill in the art to obtain mono or di hydrochloride salt, because there are two nitrogen atoms available to form mono or di salt.

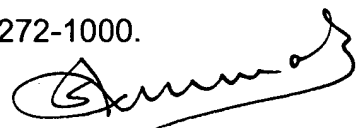

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
